Safari 
Books Online

"If we didn't have Safari Books Online, we'd be spending a lot of money on certification classes and purchasing physical technology books, which go out of date very quickly. It's clearly the best Web 2.0-based technical learning tool out there."

—Group Vice President,
Information Technology

"I love this website. I use it for all my training for my employees. We are launching a web based website builder at zroogle.com and we could not have done it without SafariBooksOnline.com. I really do not have the time to train without Safari Books Online. Thank you so much for the amazing service. You guys keep it up. I have actually got most of my staff subscribed and they love it. Easy way to find great books on web stuff."

—Jonathan Smith, Owner, Zroogle

"The Safari Books Online library contains current and even unpublished information relevant to our core products. The information in the Safari Books Online library is always readily available everywhere and having access to it gives us an advantage. With Safari Books Online we have the potential to bring all of our technical community together in a more collaborative way. They can email books, excerpts from books, and notes to each other, essentially sharing information while learning what others in the community know. For all of the technology and learning junkies at our company, the gathering of information, and being able to collaborate is a huge benefit"

—Manager,
Global Distance Learning

- Unparalleled and exclusive content, growing daily!
- Access to pre-published content to support technical innovation
- Increase productivity without interruption to workflow
- Bite-sized learning guides for busy professionals
- Keep your top talent!
- Superior functionality and interactive collaboration tools with our latest release, including:
 - **Powerful search capability**—search the entire Safari Books Online library of books and videos by using key words or advanced search queries, search within categories, by publisher or by subject, and search within books or videos.
 - **Store search results**—advanced search results can be saved in “smart” folders that automatically refresh each time they’re opened.
 - **Collaboration tools**—corporate subscribers can share search results, notes and folders among themselves and receive updates when folders have been updated by other team members.
 - **Mapping to competencies** – Safari Books Online supports specific mapping of critical content direct to your organizations’ desired competency levels.
 - **Personalization tools**—create and name folders for frequently used or favorite books (and videos), highlight text, create in-text notes with reference tags and create bookmarks.
 - **Print notes**—select and sort notes and print a summary to create a customized reference document.
